anvil-uplink | Connected to "Default Environment" as SERVER
anvil-uplink | --- Starting Server ---
anvil-uplink | Transformer Model loaded successfully!
anvil-uplink | ../backend.py:114: FutureWarning: You are using `torch.load` with `weig
hts_only=False` (the current default value), which uses the default pickle module implic
itly. It is possible to construct malicious pickle data which will execute arbitrary cod
e during unpickling (See https://github.com/pytorch/pytorch/blob/main/SECURITY.md#untrust
ed-models for more details). In a future release, the default value for `weights_only`
will be flipped to `True`. This limits the functions that could be executed during unpic
kling. Arbitrary objects will no longer be allowed to be loaded via this mode unless the
y are explicitly allowlisted by the user via `torch.serialization.add_safe_globals`. We
recommend you start setting `weights_only=True` for any use case where you don't have fu
ll control of the loaded file. Please open an issue on GitHub for any issues related to
this experimental feature.
anvil-uplink |   cnn_model.load_state_dict(torch.load(CNN_PATH, map_location=torch.devi
ce('cpu')))
anvil-uplink | CNN Model loaded successfully!
anvil-uplink | Server is running and waiting for requests...
